Autoscribe announces the release of 'Neptune' - The new and successful LIMS solution for all Water Testing Laboratories

Water testing laboratories and laboratories that support water treatment plants have long discovered the benefits of Laboratory Information Management Systems - LIMS. Today many laboratories are looking to replace earlier systems with a system that is easier to support, has a proven upgrade path and is highly flexible and configurable. These laboratories as well as new facilities being commissioned can benefit the most by installing a new configuration of the very successful Autoscribe Matrix LIMS product, called 'Neptune'.

'Neptune' has been developed with inputs from several large US metropolitan water districts and contains the extensive functionality, automation, traceability and reports needed for this application. Until now, most LIMS targeted at this application were either custom written and therefore expensive to support and hard to upgrade, or were commercial systems that delivered some of the required functionality, but were very rigid and difficult to change.

'Neptune' is built using the extremely powerful and easy to use configuration tools that are part of Matrix LIMS from Autoscribe Ltd. There is no custom code to support and no special scripts to write. Neptune delivers most of the functionality required by a water treatment laboratory out of the box. However, as each laboratory has some different requirements, these are satisfied by changes to the configuration rather than using custom code. Every Matrix system and hence, each 'Neptune' system has the same source code. All differences in appearance, terminology, workflow, tests and reports are contained within the Matrix LIMS database.

Systems are fast to implement, less expensive to support and easy to upgrade.

Autoscribe - The Winning Formula!

About Autoscribe

Autoscribe Limited is a world leader in the development and supply of successful software solutions for LIMS (Laboratory Information Management Systems) and the scientific laboratory and business markets.

Autoscribe pioneered the use of innovative configuration tools within the LIMS market and today our Matrix Plus LIMS software is seen as the industry standard to which others aspire.

Autoscribe offers a wide portfolio of products and services including systems for LIMS, sample tracking, instrument calibration and maintenance, stability testing, customer complaints management, ISO9000 protocol driven training records management and resource planning. Our customers include leading analytical, oil, pharmaceutical, biotechnology, chemical, and consumer products companies as well as academic research institutes, hospitals and many others.

Founded in 1981, Autoscribe is a privately owned UK company. Worldwide we are represented by a network of business partners in regions including the USA, France, Benelux, Germany, Switzerland, Scandinavia and Australia. Our organisation includes a dedicated team of developers, technical support specialists and sales & marketing professionals.
