Shake-up your lab and business scheduling

[Helping Business Raise Productivity](#)

To help laboratories raise productivity through better resource tracking and planning, a new software package called Resource Planner has just been unveiled by Autoscribe.

Often in a laboratory, new tasks arrive at different times and, in some cases, resources are lost. This complex and time consuming process places a significant drain on resources and planning. To address this need, Resource Planner uses what-if scenarios by recalculating work completion times, and adjusting the priority of tasks accordingly.

Resource Planner looks at any new or outstanding laboratory task and suggests an optimal plan for completion based on workload priority, task completion times, and resource availability. Short term planning is achieved through automatic weekly scheduling and work sheet generation, while longer term planning is possible through due date checking and task completion time allocation.

Resource Planner identifies expertise and instrument availability, and even the appropriate member of staff assigned to a specific task. Information is also presented in clear, highly intuitive graphs for quick and easy assessment.

Built using the latest Microsoft.Net framework, Resource Planner has the look and feel of Matrix Lims, Autoscribe's primary laboratory management system. It uses artificial intelligence algorithms to generate plans for maximum performance and results in the workplace.

About Autoscribe

Autoscribe Limited is a world leader in the development and supply of successful software solutions for LIMS (Laboratory Information Management Systems) and the scientific laboratory and business markets.

Autoscribe pioneered the use of innovative configuration tools within the LIMS market and today our Matrix Plus LIMS software is seen as the industry standard to which others aspire.

Autoscribe offers a wide portfolio of products and services including systems for LIMS, sample tracking, instrument calibration and maintenance, stability testing, customer complaints management, ISO9000 protocol driven training records management and resource planning. Our customers include leading analytical, oil, pharmaceutical, biotechnology, chemical, and consumer products companies as well as academic research institutes, hospitals and many others.

Founded in 1981, Autoscribe is a privately owned UK company. Worldwide we are represented by a network of business partners in regions including the USA, France, Benelux, Germany, Switzerland, Scandinavia and Australia. Our organisation includes a dedicated team of developers, technical support specialists and sales & marketing professionals.
