A weight off your mind

New software for collecting routine weight measurement data from laboratory balances and scales has been introduced by Autoscribe.

Software is pre-configured to collect data from most makes of laboratory balance and to transfer it directly into a spreadsheet or LIMS database as required. Balancetalk is pre-configured to collect data from most makes of laboratory balance and to transfer it directly into a spreadsheet or LIMS database as required.

There is no complicated implementation to go through, so the set-up takes just a few minutes, and the gains in accuracy and efficiency are immediate. User-defined prompts permit the collected weight data to be matched to sample batch numbers, user names and product description etc. Automating data collection through Balancetalk removes the possibility of transcription errors when recording results, says Autoscribe. However, it also says Balancetalk is more than a rapid and accurate data recording tool.

It is pre-configured with many standard weighing applications including moisture analysis, check weighing, density measurement, content uniformity, difference and counting. Standard wastewater templates are also available for total % solids, total suspended solids and total volatile solids.

Further applications can be configured by the user, confirming Balancetalk as a user-friendly tool that will improve efficiency and accuracy in several of the scientist's routine yet most important tasks.

About Autoscribe

Autoscribe Limited is a world leader in the development and supply of successful software solutions for LIMS (Laboratory Information Management Systems) and the scientific laboratory and business markets.

Autoscribe pioneered the use of innovative configuration tools within the LIMS market and today our Matrix Plus LIMS software is seen as the industry standard to which others aspire.

Autoscribe offers a wide portfolio of products and services including systems for LIMS, sample tracking, instrument calibration and maintenance, stability testing, customer complaints management, ISO9000 protocol driven training records management and resource planning. Our customers include leading analytical, oil, pharmaceutical, biotechnology, chemical, and consumer products companies as well as academic research institutes, hospitals and many others.

Founded in 1981, Autoscribe is a privately owned UK company. Worldwide we are represented by a network of business partners in regions including the USA, France, Benelux, Germany, Switzerland, Scandinavia and Australia. Our organisation includes a dedicated team of developers, technical support specialists and sales & marketing professionals.
