## **Instrument data comes together**

### **LimsLink Products**

Windows based software can link instruments and LIMS into a seamless automated solution to maintain data integrity across an entire laboratory. Laboratories can now raise productivity by linking a wide range of instruments across a common interface platform using the new LimsLink software from Autoscribe. This powerful Windows based software can link instruments and LIMS (such as Autoscribe's Matrix LIMS) into a seamless automated solution to maintain data integrity across an entire laboratory. The versatile two-way communication helps manage data flow to and from various sources, while flexible data processing and configurable user displays address many needs. LimsLink reduces the level of technical analyst involvement through direct data transfer and raises efficiency by automating the collection, calculation and reporting of laboratory data. Comprehensive reports with data from multiple instruments are easy to create, whilst common statistical SPC tools have been incorporated. User security access has also been addressed to meet the latest ISO standards. Laboratories would typically use LimsLink to generate work lists from a LIMS system, communicate with various instruments, transfer work lists to an instrument, combine results from multiple instruments, review results and automatically perform calculations. An optional control module is also available to automate various instruments such as robots, samplers, detectors, meters, pumps and dilutors through an RS232 link.

### **About Autoscribe**

Autoscribe Limited is a world leader in the development and supply of successful software solutions for LIMS (Laboratory Information Management Systems) and the scientific laboratory and business markets.

Autoscribe pioneered the use of innovative configuration tools within the LIMS market and today our Matrix Plus LIMS software is seen as the industry standard to which others aspire.

Autoscribe offers a wide portfolio of products and services including systems for LIMS, sample tracking, instrument calibration and maintenance, stability testing, customer complaints management, ISO9000 protocol driven training records management and resource planning. Our customers include leading analytical, oil, pharmaceutical, biotechnology, chemical, and consumer products companies as well as academic research institutes, hospitals and many others.

Founded in 1981, Autoscribe is a privately owned UK company. Worldwide we are represented by a network of business partners in regions including the USA, France, Benelux, Germany, Switzerland, Scandinavia and Australia. Our organisation includes a dedicated team of developers, technical support specialists and sales & marketing professionals
