New software module for managing instrument calibration and maintenance routines

Looking after your instruments with LIMS

Laboratories throughout industry will find it easier to keep all instruments in prime working order and to avoid expensive down-time, thanks to a new software module for managing calibration and maintenance routines.

This is a standalone package or a module for the Matrix LIMS package, developed by Autoscribe. The same module also provides for keeping a full inventory of all equipment, including warranty details and lists of consumables, along with calibration limits and other performance criteria.

The system will assist any laboratory to keep instrumentation in good order and available for use, by alerting managers of when and how equipment needs to be calibrated. Spurious and unreliable results are avoided because equipment is automatically assigned an unavailable status when the calibration or maintenance period is overdue. Costs and equipment downtime can also be tracked, potentially valuable information when considering or negotiating future equipment purchases.

About Autoscribe

Autoscribe Limited is a world leader in the development and supply of successful software solutions for LIMS (Laboratory Information Management Systems) and the scientific laboratory and business markets.

Autoscribe pioneered the use of innovative configuration tools within the LIMS market and today our Matrix Plus LIMS software is seen as the industry standard to which others aspire.

Autoscribe offers a wide portfolio of products and services including systems for LIMS, sample tracking, instrument calibration and maintenance, stability testing, customer complaints management, ISO9000 protocol driven training records management and resource planning. Our customers include leading analytical, oil, pharmaceutical, biotechnology, chemical, and consumer products companies as well as academic research institutes, hospitals and many others.

Founded in 1981, Autoscribe is a privately owned UK company. Worldwide we are represented by a network of business partners in regions including the USA, France, Benelux, Germany, Switzerland, Scandinavia and Australia. Our organisation includes a dedicated team of developers, technical support specialists and sales & marketing professionals.
